

	3.1	3.2
Functional Area	Research and Development Support	Engineering, System Engineering and Process Engineering Support
Contract #	N00178-11-D-6433 FD01	N00178-11-D-6433 EHP1
Ordering Activity	NSWC, CARDEROCK DIVISION, MARYLAND	NSWC Carderock NAVSSES
Program Description	<p>Tasked to support technical data and training requirements for engineering and technical services in the following areas:</p> <p>1) Technical Data Migration to S1000D and MIL-DTL-24784; 2) Virtual World, Modeling, and Simulation Support; 3) Standard Navy Technical Manual (TM)/Interactive Electronic Technical Manual (IETM) Hardware and Software Infrastructure Support; 4. Standardized Technical Data Encoding Recommendation and Enforcement Policy; 5) New Processes for Organic Life Cycle Maintenance of Technical Data Products; 6) Shipboard Electronic Performance Support System (EPSS) and Shared Data Environments; 7) Improved Technical Data Repository and Real Time User Access Technology.</p>	<p>Standard NAVSEA Integrated Publishing Process (SNIPP) support; technical manual (TM) development, maintenance, and delivery support; logistics engineering support; Planned Maintenance System (PMS)/Technical Feedback Reports (TFBRs) support; supply, logistics, and Integrated Logistics Support certifications support; and training/curriculum development support related to Integrated Logistics Support services for Hull, Mechanical and Electrical (HM&E) technical data development, maintenance, management and associated process support. This support requires the contractor to provide: technical data systems development, maintenance and infrastructure support; support of joint logistics products and processes; design, development, testing and fielding support for joint technical data integration efforts; technical data packages and other data support; technical data conversion; distribution of technical data; and management of technical data.</p>
